

HD CAMERA POCKET

Illustration of Camera Functions:

Step 1:

Insert a micro-SD card (Max 32GB).

Step 2:

Hold on the top button for 3 seconds, it will power on and record audio & video automatically with slow red indicator flashing, and the camera will produce a new file every 10 minutes.

Press the top button once to stop recording, save the video and go into stand-by mode, red indicator will stay on. If you press it again, the camera will record again. Hold on the top button for 3 seconds, the camera will be turned off.

Step 3:

When you finish recording, just plug the USB into a computer to view the files.

However, as USB transferring speed is limited, it is strongly suggested that you may copy the files to the computer for playing.

Synchronize with computer time

1. Insert Micro-SD card and turn on the camera.
2. Connect with PC, open "My Computer" and you will find a mobile hard disk then open it. double click "updater_time.bat".
3. Disconnect the camera from PC. Now you have finished the time setting.
4. After synchronization, for the first time you power the camera, it will need 3 more seconds to start.

Important note (Don't use it illegally)

1. You may select D1 (848*480 pixel) or HD(1280*720 pixel).

2. If the red indicator is automatically turned off after 10 seconds quick flashing, there are three possibilities.

- A. the camera is not inserted a Micro-SD card.
- B. the Micro-SD card is full
- C. the battery is low power

3. If the power is low, plug the USB into computer to charge it. The red indicator will flash during charging. And it will be always on when the charging is finished.

4. Sometimes the pocket DV will crash for wrong operation. Now just use a pin to touch into "reset" hole to restart.

5. The indicator will flash quickly when the micro SD card is full, and the camera will turn off one minute later.

6. Don't take micro SD card out during recording, or the last video will be lose.

Specifications:

Size	11.7*3*1.6CM only
Weight	32g only
View Angle	72 degrees
Video Format	AVI
Frame Rate	30fps
Video Resolution	1280*720 /848*480
Audio	supported
Micro SD Card Support	2G to 32GB
Battery	720MAH Lithium-ion battery
Battery working time	Max 5 hours
Operating Temperature	0 - 65 °C / 32 - 149 °F
